

AUTOMATION

We create complete solutions for measuring, testing and assembly systems from planning to production to assembly and commissioning.

Convince yourself of NMMH -

Innovation is our world

AUTOMATION

NMH Automation - Our new automation solution for the production area

- THE FLEXIBLE AND INDIVIDUALLY ADAPTABLE SOLUTION FOR YOUR PRODUCTION -

In the course of the further automation of its own production, NMH has developed a flexible and innovative solution for automation and modernization of individual production areas. NMH works closely with a large number of manufacturers of machining centers to achieve an optimal result and to integrate our solutions optimally in existing production structures. Regardless of whether individual, small series or large series production - our development can be used anywhere. We offer our customers a for your existing production area and yours needs tailored solution.

Would you like to automate your production without renewing the existing structures? Then contact us...

We will provide you with a free, individually tailored offer.

AUTOMATION

FEATURES:

- >> Telescopic robot axis
- >> Universal workpiece shelves
- >> Easy to dismantle
- >> Universal gripper for up to six variants
- >> Plausibility check based on component contours
